Experience

Software Engineer

Singapore

[Allium Labs](#)

2022 – present

- **Employee #5**, revenue **2-3x** every year. Backed by **Kleiner Perkins and Amplify Partners**.
- Led end-to-end development of real-time APIs, serving **petabytes** of data with p50 latency of **1 second**. Worked on database ingestion, transformation, and design; API design; deployments; [performance](#) and observability. Built with Postgres, Clickhouse, Golang, and Python.
- Kickstarted a new process and set of tools to ingest new blockchains in **30 minutes** while competitors take a few days.
Wrote a UI (with React and Typescript) and documentation to allow non-programmers to self-serve ingest **100 blockchains**. This became a differentiating factor for winning institutional clients while competitors were unable to break through.
- Co-built the first full stack application with **FastAPI, React, and Typescript** with features like permissions and authorization, query editor, and tree-style schema browser.
- Received **~15 qualified candidates** in hiring pipeline from [hosting talks](#) and reaching out to prospects. **Designed and calibrated interview questions** still in use today.

Quantitative Research Intern

Singapore

Jump Trading

2018, 2019

- Researched and simulated the impact of trading signals with machine learning algorithms.

Software Engineering Intern

London

Bloomberg

2018

- Created a load balancer for the financial data core service in C++.

Software Engineering Intern

Singapore

Twitter

2017

- Built data pipelines with Scalding on Scala.

Education

National University of Singapore

2020

in Computer Science and Mathematics

Awards

International Mathematical Olympiad Medalist

2014, 2015

Skills

Languages: Python, Golang, C++, SQL, Scala, Rust, Java

Web: React, Next.js, Redux, Typescript, Javascript

Data Engineering: Snowflake, Clickhouse, Postgres, RDS, Aurora, Temporal, Airflow, Kafka, Pubsub, Dataflow, Apache Beam, dbt, RisingWave, SQL, BigQuery, Databricks

Others: AWS, GCP, Kubernetes, Helm, Argo CD, Redis, vim
